PERFECT FOR SKATING — When freezing rains turned area streets and roads into sheets of glass, many youngsters (like the one above) found them very convenient for ice skating. Many of the main arteries were cindered and passable, but the secondary routes made driving treacherous. The skating pair is Janet Berry and Douglas Strouss of East Stroudsburg. Your WILL protects your rightful beneficiaries. Have your LAWYER prepare it properly for you.

Perhaps yours is a modest "estate." Why have a Will? First of all, a Will disposes of your property in accordance with your wishes. Your lawyer states your wishes exactly, according to the requirements of the law.

Second, your lawyer's knowledge of inheritance tax laws is important. His experienced advice may help your beneficiaries avoid unnecessary tax

## Freedom To What?

Poland is a puzzle to the free world. because while it is a communist state beyond any shadow of doubt, Poles express some surprising sentiments in public and still manage to avoid being hustled off to the salt mines.

Prof. Leopold Infield, a Polish theoretical physicist, popped off not long ago about freedom and liberty. These are topics that anyone inside the Red Empire usually handles fearfully. But Prof. Infield complained that there isn't much freedom and liberty within Poland.

"We speak of competition with the West," he wrote in a Polish journal. "That competition cannot be purely on an economic plane. It must also be on the level of freedom and on the level of liberty.'

He went on to say that while he understood that the process of communization necessarily deprived people of these concepts, that he hoped that mature communism would allow his children more freedom and liberty in their times.

It took courage for the professor to

#### Opinions Of Other Editors No Need For Boredom

There are lots of people in this vast, wonderful and exciting country who are bored. There are people who don't know what to do with themselves, who flit from on stimulus to another and are bored to tears. There are many people who fear retirement because they think that when retirement comes life will have lost its savor and they will find nothing interesting to do.

This is a strange phenomenon. We live in a world of infinite wonder and beauty and fascination. The cultural riches available to most Americans, even to those of small means, exceed the imaginings of past generations. A man could spend all his waking hours listening to music, reading books that entertain and instruct and stimulate, looking at works of art and yet

die leaving much to be seen and heard. If such things are not to a man's liking he can find endless interest in the natural world about him. Or if he becomes restless and wants to "do something," there are all kinds of ways to contribute to society and gain inner

The truth is that our system of education somehow fails to give men and women the inner resources - the cultural interests, the sense of wonder, the desire to serve and learn - that they will increasingly need as leisure time increases. If we apply what Herodotus had to say to government, using current dialect, we might say that one of the tasks of the day is to keep the show on the road. The Depression made the gov-

Attempts at establishing a world state, or a world union, or a world organization were proposed in many forms but out of it all came the United Nations which started with 51 members and has now grown to 103 members and the growth has not yet come to an end. Every inch of the Earth is permitted to assert that it is a state except Katanga which is forbidden self-determination. If Mongolia may be a free state, why not Katanga? This puzzle has not been solved by anyone nor can it be understood why American jets and Irish troops are used to keep Katanga a part of the Congo but only Russian tanks were used to kill the people of Hungary. If the United Nations is to go in for promiscuous killings, it might kill some of those whom the Russians want to keep alive. It seems as though the United Nations specializes in fighting those whom the Russians hate.

these days when a Program is hard to keep fixed for more than a few moments. Our Secreary of State, Dean Rusk, rushes off to Europe to compose such a program with our allies whom we have helped to remain alive, but they have programs of their own. Let us not be too excited about that, for in the end, they will know that we shall either stand together or fall together and that if the United States is unable to maintain a program, the whole Western World will collapse. Good sense rather than inordinate pride must prevail. Our major difficulty is that in the Western World there are too many cooks-too many great men whose varieties of greatness have to be reconciled until a program can be fitted together as it was during the past two wars. This is what we face at the present moment and we either find a path to unity or accept defeat.

The Allen-Scott Report

By Robert S. Allen and

Paul Scott Washington-A further lowering of trade barriers to Red China is high on the list of issues Prime Minister Macmillan contemplates discussing with President Kennedy at their forthcoming meeting in Bermuda.

The President was apprized of this through the British embassy before leaving Washington on his goodwill tour to Venezuela and Colombia.

Impelling reason for Macmillan's bringing up the prickly political problem of expanding trade with Communist China is the latter's indicated desire to obtain extremely valuable strategic supplies from Britain, foremost among them:

A modern business firm had just hired a psychologist as a personnel manager. The psychologist began by hiring a new secretary for the head of the firm, and the boss was looking on while the expert gave a psychologicial quiz to three feminine applicants.

I shan't try to describe each in detail, but I can mention that the most stunning is a very complete set in gold and white brocade case, at 16.50. Next in price is red alligator-encased at 8.95. A third, in gold plastic, is only 6.50, and at 3.25 there's a set in pearlized white plastic with metal trim that can be initialed. Esther Ainspac makes the observation that this would be a grand gift for the teen ager who is just beginning to be 'fussy" about her grooming. I agree . . . but it would also be a nice, inexpensive gift for her mother or any other woman.

All of these sets are by Revlon, as is a black leatherette man's case that combines manicure implements with a red velvet-lined compartment, divided for cuff links and other jewelry. The men's manicure items really look masculine, having bulk and strength . . . nothing even the least remotely feminine. This set for a Very Special Him is 18.50 . . . something the entire office might purchase for the Boss, or a devoted wife might select for HER boss, whom she doesn't really acknowledge as such, but who deserves the honor and probably accepts it graciously.

From our Cosmetic department we suggest a gift that will undoubtedly be welcomed by many women, both young and not-so-young: the Max Factor cosmetic set, comprised of plastic compact and oval lipstick case with refill, in three colors: Pink, Blue, or White. These retail at 3.85 plus tax. The same set is available in gemset metal at either 7.00 or 10.00.

Imported too - from Pakistan, I believe - are the ivory-inlaid chess sets with ivory chessmen being sold in our Gift department at 25.00 and 30.00. If you've the money to spend, and a son, husband, or even a daughter who loves the game, say a quick "CHESS" to these in a loud voice, and you'll make a hit with the recipient. They're so lovely, you'll keep them out in view, even when not in use.

#### Paintings On Exhibit At **Art Center**

"DECK THE HALLS" is one of our dearest Christmas slogans-after "Peace on Earth, Good Will Toward Men"-and, indeed, the Pocono Art Center feels that it is apropos to both these urges to start its program of making paintings available at this season.

To freshen the appearance of one's home, and spice the conversation of Christmas gatherings, there are paintings of all sizes available, both representational and abstract. Thus the oppportunity of living with paintings, of looking at these visual expressions by artists, is offered as an adventure in keeping with the excitement of

But this is not a short-range program. It is the intention of the Pocono Art Center to foster and maintain this as a regular program. The Center's share in the program is intended to be used as a fund for bringing in exhibitions, such as paintings by children of South America and Hawaii for our children to look at, and also for buying prints which can be incorporated in the plan.

The local artists participating at this time are: Mildred Burns, Otto Christ, Beatrice Crowther, Marcia Clapp, Agnes Dyer, Henry Evans, Peter Heiden, their homes. This is what happened to me last year. I was stuck at home with our little one because my wife worked evenings during the pre-Holiday season. Now, being stuck with our Tommy, was not at all an unwelcome thought, since I don't see him all day, and he goes nighty-nite so early in the evening. It gave us a chance to play and have little fello-to-fello talks. We even watched the Wednesday night fights, providing he'd had a long afternoon nap.

But there was one night when I was supposed to return to the office after supper to clean up some extra work. Our firm is busy before Christmas, too. I didn't know you

our friends but they were already occupied and couldn't think of a sitter either.

heart, you placed an ad this year. What a relief!

Because you traded places with me, it's simple to live up to unscheduled obligations or let Tommy's mother work, or go shopping or . . . oh, most anything when the need arises.

And . . . I hope you stay a long time.

Dear Hit: Don't talk to him about it. What you feel is not "love"-it is a crush on an older man. It happens to many girls your age, but they outgrow it. You've daydreamed yourself into a hopeless situation. Now, face reality. Settle down and have fun with kids your own age, concentrate on your school work, and think of your teacher only as a good friend.

#### SPIRILLUM **UNDULUM?**

Spirillum undulum are microscopic bacteria with cells in spirally twisted filaments.

The study of bacteriology is essential to the welfare of the human race. Unfortunately many potential bacteriologists may never even begin to study this important science because they may never go to college. Already many of our colleges are overcrowded and in 10 years applications will double. We will need more and better college laboratories and thousands more of the highest quality professors.
